

NENE VALLEY RAILWAY CARE AND CONSERVATION POLICY.

Date on which the policy was approved by the board:-5th February 2020.

Policy is to be reviewed at least once every 5 years.

This document details the policy which NVR uses in the care and coservation of its collection.

It is our aim to continue to preserve, restore, maintain and care for our collection and aim to achieve the highest standard possible.

We will aim to store all artefacts in our collection in the correct environment dependant on the condition and integrity of the object where possible. In doing so said objects can be preserved for future generations.

The board will agree a budget and apply for grants as available to ensure that the care of our collection is financed.

We will take active conservation action where such action is necessary to prevent and reduce deterioration caused by the passage of time.

We will maintain to a high standard all working artefacts.

In all cases we will attempt to avoid damage and preserve all original components.

Signed on 5th February 2020.

S. Derry (SARAH DERRY)

Board director
